

ROLLER BLINDS

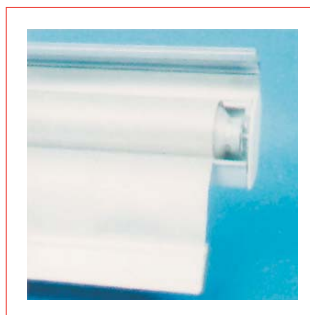

- > Significant savings in energy consumption.
- > Initial costs recovered within months.
- > Ideal for all types of refrigerated display cabinets.
- > Specially developed, durable and patented aluminium foil.
- > Constant temperatures maintained prevent condensation and ice-build-up.
- > Simple installation and easy to operate.
- > Easy to clean, mould and algae resistant.
- > Can be tailor-made for specific applications and units to ensure flush fit.
- > Manual configurations available for both upright and island type units.
- > Motorised option available only for upright type units - small motor, housed inside blind assembly, capable of operating up to 12.5 metre blind.
- > Optional durable aluminium cassette housing protects blinds fitted to island type cabinets.

Comprehensive test reports on energy savings are available on request.
